Dear Mr.Zbinden,

I was deeply moved to read the beautiful tribute you have paid Mrs.Elisabeth Haich and me for our humble work we have done over the past five decades. I thank you also in her name. I take it as a tribute to our pioneering work in Switzerland whose people we have come to love deeply. They are quiet, conservative and careful, and once this thin crust is broken through, you have won their hearts for good.

The work you are doing is beautiful. The attributes of the teacher, through his silent example awakens the dormant qualities in the student. One gram of silence is worth tons of empty talk. May your noble work be to plant the seed, then let it grow on its own to bear fruit.

Wishing you the joy of seeing the unfoldment of perfection in those you seek to serve. With my sincere good wishes for your inner peace.
